Canadian Expeditionary Force Command

CEFCOM REVIEW OF BOI REPORT ON THE ACTION  
AT FOB ROBINSON, AFGHANISTAN, 28/29 MARCH 2006

- Refs: A. Your 1080-1 dated 8 March 2007  
B. HQ CEFCOM 1080-1 (S1) Terms of Reference – BOI FOB Robinson  
C. Board of Inquiry, FOB Robinson, Afghanistan – 28/29 Mar 06  
D. CFAO 24-6, paragraph 29

1. In completing the review of Refs B and C, I understand that the appropriateness of the standard used by the Board in assessing fault was determined to have been inappropriate. I further understand that in order to address this matter you directed an evidentiary review applying the appropriate fault standard and it was on the basis of this review that you ultimately determined that you concurred with the Board's finding that no blame can or should be assigned to any individual.
2. Prior to approving the BOI report, I require confirmation that the fault issue was addressed as described above and that in doing so the appropriate fault standard was applied. In the circumstances and given the desire to release the BOI findings in lockstep with the USA, I will require your response as quickly as possible.

R.J. Hillier  
General
