

The Government of Canada is now providing funding so that potential suppliers can access electronic documentation relating to federal opportunities on the Government Electronic Tendering Service (GETS) free of charge. GETS supports the federal government's sustainable development practices as it encourages moving procurement from a paper-based to an expanded electronic service.

CIED Call For Proposals (2008)

Trade Agreement: Agreement on Internal Trade (AIT)
 Tendering Procedures: All interested suppliers may submit a bid
 Attachment: None
 Competitive Procurement Strategy: Best Overall Proposal
 Comprehensive Land Claim Agreement: No
 Nature of Requirements:

Call for Proposals

Defence R&D Canada (DRDC) is co-ordinating an R&D effort on behalf of the Department of National Defence (DND) to examine and further develop promising technologies to attack the Improvised Explosive Device (IED) Network. DRDC is seeking promising ideas and technologies from the Canadian R&D community (industry, academia, and other R&D performers) that could be applied effectively and quickly.

DRDC is implementing a special project under the Technology Demonstration Program (TDP). A Guidebook which outlines the phased approach to solicit projects under the Counter-IED TDP is available from the DRDC website at www.drdc-rddc.gc.ca. Proposals must be prepared in accordance with this Guidebook. Under the first phase, DRDC is soliciting project synopses of ideas/technologies, etc., which will be evaluated against the criteria outlined in this Guidebook. Proponants submitting proposal synopses, which are selected at this stage, will be requested to submit a full proposal for review, evaluation and funding under the Counter-IED TDP. Ideas or projects that do not fit under this Counter-IED TDP may be referred to other DRDC or DND organization(s) for consideration.

The objective of this Counter-IED TDP is to develop / deliver technologies that will assist the Canadian Forces in Attacking the IED Networks that are employed by insurgents against CF and NATO personnel in **AFGHANI STAN**. DRDC is interested in receiving proposals that focus on:

- a. The Analysis and Prediction of the IED threat such as behavioural analysis, data gathering and management during the Intelligence Cycle, psychological operations, behavioural pattern recognition, intelligence surveillance, and reconnaissance and forensics tools and analysis;
- b. Detection and sensing of IEDs such as for stand-off detection, pre-detonation of IEDs, false alarm reduction and pattern recognition;
- c. IED training support to the CF.

Further information on the Call for Proposals process can be found on the DRDC Web Site at <http://www.drdc-rddc.gc.ca/>. For further information, please contact the Co-ordinator at proposals.ied@drdc-rddc.gc.ca.

Delivery Date Required: 2010

The Crown retains the right to negotiate with suppliers on any procurement.

Documents may be submitted in either official language of Canada.
