IEA's declaration about International Peace Day

International peace wanted and oppressed people have been witnessed that the days which globally named for the human defiance and salvation are now celebrating by the human destructors, it proved that they are hardly working for the human destruction; they are the factors and criminals of world crimes.

If we only take as example the celebrating of 21st September which already celebrates around the world especially in western countries, where always celebrate by high level and respectfully ceremonies also they spend most money for the celebrations.

But if analyses practical acts of US, UK and western rulers that how they struggle for the human peace and security, how they practically act their claimants, it will actually be showed that if there are no American, British and other selfish regimes and do not obstacle before the world peace so, there will not be insecurity in the world, there will be virtual peace throughout the world, the war will end and the world would change by virtual peace and security.

But that is the US and its led Coalition which turn down the would into the fire pit, castrate the two neighbors between them by different matters, finish the peace from them broke down their National means, turn them into poverty etc...

If the Iraqi and Afghani people Ask the International Justice "by the pretence of International peace day" that who dismiss the peace since the last five and seven years in both country, opened the crimes door, entered all the means of killing and Raid, flowed brooks of blood, broke down the importance of independence, trampled the whole human rights, killed and injured two hundreds innocent civilians, killed six years children, just in one month, tortured seventy years elder men in Gontanamo and Bagram prisoners.

It is clearly showed that the human claimants nothing can ask the cruel regimes that how kind of democracy is that to martyr a hundred of thousands of Muslims since last seven years.

As the enemies of mankind and the anti-human plans are well known, in this day they call themselves as the human protectors, so it perhaps that the International Peace Day is a cheating plan of Oppressed nations.

In spite of this, if NATO and US forces and their Afghan Allies aspire stop the war without any cheating plan and respect the International Peace Day. Islamic Emirate of Afghanistan (IEA) will also declare order of defiance position.

Islamic Emirate of Afghanistan
